

Crypto Starter Guide

Welcome! If you're reading this, you're ready to take your first steps into the world of cryptocurrency - safely, smartly, and profitably. This guide is beginner-friendly and designed to help you understand, invest, and grow with crypto - without falling for hype or scams.

What You'll Learn:

- What cryptocurrency really is
- How to set up your crypto wallet
- How to buy your first crypto
- 3 smart ways to earn with crypto
- Safety tips to protect your assets
- Recommended tools and platforms

What Is Cryptocurrency?

Cryptocurrency = Digital money that lives on the blockchain, a secure and transparent ledger where no one can cheat the system.

Famous examples:

- Bitcoin (BTC): The original and most valuable crypto
- Ethereum (ETH): Built for smart contracts and apps
- Solana (SOL), Cardano (ADA): Known for fast, scalable transactions

Set Up Your Crypto Wallet

You need a wallet to store your crypto:

Hot Wallets (Free, App-based):

- MetaMask
- Trust Wallet
- Coinbase Wallet

Cold Wallets (Hardware, safer):

- Ledger Nano X
- Trezor One

Important: Save your 12/24-word recovery phrase OFFLINE. Never share it.

How to Buy Your First Crypto

Use a trusted exchange:

1. Sign up at:
 - Coinbase (easy for beginners)
 - Binance (low fees)
 - Kraken (great security)
2. Verify your ID
3. Link your payment method
4. Buy your first coin (start small)
5. Transfer it to your wallet for safety

3 Smart Ways to Earn with Crypto

1. HODLing - Buy and hold for long-term value (e.g., BTC, ETH)
2. Staking - Lock coins and earn rewards (e.g., ETH, ADA)
3. Crypto Cashback & Rewards - Use apps like Crypto.com to earn while you shop

Stay Safe in Crypto

Use trusted apps and platforms

Never share your wallet recovery phrase

Turn on Two-Factor Authentication (2FA)

Don't fall for scams

Use a cold wallet for large holdings
